Not only that, but the telekinetic heads are replaced with mechanical (the right hand is just a plastic replica). As a result, your life takes a dangerous turn. You start working in strange places, and carrying various objects. You even go to the investigation of paranormal phenomena. To do this, you need to solve puzzles and find clues. Vengeance: Telekinetic. In addition to your telekinetic head, you are also gifted in a variety of other talents, which will become more useful in the course of your adventures. At the same time, your head, instead of its natural counterpart, is replaced by a plastic replica. You have lost a lot of blood and you sense a strong smell. You lift yourself up, and find that people around you have been murdered. Your powers don't work in this place, and you even don't know if they have deliberately disabled them. There is a room with two metal bars, where you hear sounds, as if something is trapped. There is blood everywhere, and the place is silent and gloomy. So, finally, everything begins to go down. And then it starts. At first, it seems to you that time is going too slowly, but then you are unable to recall a day, for you, nothing goes as it should. You are trying to find the source of these strange events and finding ways to stop the killer.   (on the Rift) By Katelyn Abbas [Image: A starry night, in a Lazy Town, a dark, almost-deserted road. Scattered lights from houses are barely discernible. In the distance, a large darkness, possibly a storm. A storm that seems to not be moving, but perhaps is.] [Image: Spikes dance on the right side of the lens; a gun, covered in skin and sweat, peeks out from the open sniper scope and fires up at a target, who fires back, hitting the monster in the stomach. The target breathes heavily and falls to the ground in a faint. The blood of the vampire spills over the road, turning it into a pool of red blood. Black leaves cover its legs, and it shivers slightly as it lies still, but eerily enough, the pool of blood stirs and its hand does not disappear.] [Image: As the shadows start to contract around the scene, the shadows of power, of hatred, of resolve are drawn thick and dark over the scene, as if drawn by the force of the supernatural, the powers of the world, and they start to enfold the vampires that wandered into the desert and the small town during the start of the story. Heroes and heroines emerge from the trees to help the wounded.] [Image: An American soldier of all, women, and men, crouch around the wounded. An officer, in a dark suit, with a grey face is loading a scope in his sniper's rifle. Behind him, a sniper, in a similar uniform and suit leans over him, guiding him in his movements.] "And you had killed six Vampires," the HU-4 MAC-10 hissed, "two of them Avatars..." I could hear the whispering and pounding in my head. I could hear all those things and see it all in vivid details as it had happened. I could hear them and I could hear myself talking. "And you had been the one to kill it!" [Image: Nick was grasping his stomach, the blood was all over him, the photographer took immediate photogs of his stomach, his hand, his open eye, the blood covered the face of the fallen model. The photographer recoiled, taking the frames out of the camera, and also recoiled from some weird chemical spray on the lenses
