Thank you for your continued support of the Risen series and TANK FORCE games. To listen to more information about the upcoming action RPGs, please visit Have a good rest of the year! TAKE OFFER NOWQ: Javascript Object property access I am experimenting with my mind over a problem in Javascript (I am new to it). Can you please explain what is the difference between 1. assigning a property name to a variable and then accessing it var obj={name:"xyz",q:1,etc} obj.name //alerts 'xyz' and 2. initialising a property inside an object var obj={x:true,y:"two"} var obj.x //alerts "true" What is the difference? A: There is no difference. For a brief intro on objects and variables, see this answer. [Use of the "The Shape Selector" software for determining the minimal doses for treatment of stomatologic pathology]. Practical use of software "The Shape Selector" in the programme of minimal doses determination was demonstrated. The lists of conclusions made by the authors for determining minimal doses for treatment of phlogistic processes of stomatological zone of oral cavity and

Elden Ring finally surfaces, an action RPG developed by SCS Software and will be released this year in 2018 by Wargaming.

The title is the latest product created by Wargaming, a Polish developer of online and mobile games based in Warsaw, that has developed a whole range of quality titles since its creation. This will be the fourth game by SCS, Wargaming's partner, a company that has been providing MMO services to games such as Goblins & Goblins 2, and has mainly focused on developing games for iOS and Android. (Summary by Carlo Bellezza)
