The program offers an array of tools that enable users to model 3D drawings and create models from 2D and 3D drawings, and import and export data to and from a wide variety of formats. The software provides a full complement of 2D and 3D vector graphics tools, including 2D line, 3D line, 3D polyline, 3D spline, and 3D arc. The program also includes powerful 2D and 3D polygon modeling tools for creating and editing 2D and 3D polygons. Advanced features include tools to create and edit text, a 2D object class library, the ability to convert and modify 2D files to and from 3D, and an extensive library of 2D and 3D symbols. AutoCAD is also equipped with a library of 2D and 3D objects that enable users to create images, documents, and other media. This sophisticated software is the premier 2D and 3D CAD program for professional design and drafting, providing drawing, technical, and architecture-related tools in a user-friendly environment that enables designers to quickly and easily create drawings. History AutoCAD was developed in 1981 by Stelter, Stevens, and Christopher Dahl at the office of Scott & Stringfellow, Inc. Dahl would later form the Dahl Associates. After a brief hiatus, AutoCAD was rereleased in September 1982 for the Macintosh platform. Autodesk acquired AutoCAD,

Turin Motor Show The Turin Motor Show, Turismo, or Fiat Automobiles and Turismo for short, is an annual automotive trade fair held in Turin, Italy. It was inaugurated in 1932 and was the first motor show held in Italy. History The first Turin Motor Show was held in 1932, soon after the end of the First World War and the advent of the new era. The first show was officially inaugurated by Carlo Rosso, Minister of Labor and Industry at the time. The new show attracted 600 exhibitors, all of them Italian or foreign companies except for the Dutch Marangoni, representing the oldest coachbuilders in the world. The second show was held in 1931, and the third one, organised by the Italian Automobile Club, was held in 1933. The next editions of the Turin Motor Show were held in 1934, 1935, 1936, 1937, 1938, 1939, and 1940. With the exception of 1938, when the show was postponed to 15 March because of the Spanish Civil War, the Turin Motor Show was held annually, and the same shows were held each year. In 1969, the Turin Motor Show was held for the last time, due to the crisis caused by the oil crises. The same year the show was reopened, in March, as the Fiat Automobiles and Turismo Internazionale (FATI) show, held in Via Nizza. The Turin Auto Show was inaugurated in 1974, then in 1976, and was divided in two: Fiat Automobiles and Turismo Internazionale and Turismo Fiat. The second edition of the Turin Motor Show was also inaugurated in 1994. The Turin Motor Show is organised by the Chamber of Turin Automotive Industries (CTAI), which is part of the Turin Chamber of Industry and Commerce, and the Turin Automobile Club. Since 2001, the show has been organised by the Motor Show and the Automobile
