Common mistakes CELPIP; This book covers thirty of the most common mistakes CELPIP test takers make in grammar, punctuation, word choice, and speech. If you don't know where exactly you made a mistake, you can check yourself by reading the "Check Yourself" section of the book. There are also sources that can be used for self-examination. If you not only know grammar well, but also have a good command of the correct pronunciation and understand what you made a mistake in this or that paragraph, then use the next section of the book. It contains additional tests to help you determine exactly what your mistake is.
