VirtualDJ 2018 has built-in video skins that allow you to display beautiful graphics on large screens or projectors in your club to show what you are doing. This is a great tool for creating pop culture. All you have to do is take any video file, paste it into VirtualDJ and see what it looks like. Create your skin. Add a video filter to the video skin using the effects panel. This will allow you to add a video to one of these skins. To set up a filter, click the filter icon to open the filter menu, and then select the desired filter from the filter list. You can also open the filter by clicking the gear icon on the video skin.
